Shade Fabric Replacement

**U-Spline Shade Fabric**
1. Spline
2. Shade Fabric
3. Heat Welded Hem Pocket

**NOTE:** Shade fabric is attached to the tube using a removable spline.

The shade fabric will arrive on site with the spline rolled to the inside. Reroll the fabric so the spline is on the outside before installing.

If applicable remove fascia.

**Z-Spline Shade Fabric for Line Voltage Motorized Shades**
1. Shade Fabric
2. Heat Welded Hem Pocket
3. Z-Spline
REMOVE AND REPLACE SHADE FABRIC

U-Spline
1. Manual shade step: Use pliers to open and remove front stop bead (standard roll) or back stop bead (reverse roll). (Figure 1)
2. Lower shade to expose tube. (Figure 2)
3. Starting at one end of the tube, pull the fabric spline out of the groove in the tube. (Figure 3)
4. Starting at one end of the tube, press the spline on the new shade fabric into the groove in the tube. (Figure 4)

Z-Spline
1. Identify the tapered edge of the spline groove. The fabric will roll off the tube in the direction of the taper after spline is installed. (Figure 1)
2. Fold the spline under the fabric as shown. (Figure 2)
3. Insert the spline into the tube groove as shown. (Figure 3)
4. Spline V will lay in tapered part of groove. (Figure 4)
