SWFcontract SOLAR SHADING SYSTEMS
REINVENTED SOLUTIONS

ENGINEERED FOR TODAY'S COMMERCIAL MARKET

SWFcontract Solar Shading Systems have always provided a clean design, along with function and flexibility for managing daylight in commercial interiors. For our new solar fabrics, we completed extensive testing and set the toughest specification for design, quality, and performance—all to give you a greater advantage in today's competitive marketplace.

OUR ADVANCEMENTS
YOUR ADVANTAGE

The Right Performance: SWFcontract solar fabrics meet or exceed the standard specification. We rolled up our sleeves to extensively research, test, and validate these fabrics, ensuring they are high quality and robust, and that they effectively manage daylight.

The Right Partners: We looked for excellence at every level when we analyzed possible suppliers, choosing the best of the best for our final partners. And because we’re multisourced, we have greater flexibility to meet your deadlines.

The Right Assortment: We’ve reduced the redundancy of the SWFcontract offering—shaping our collection based on commercial demands and market trends. Having a more concise assortment means an easier submittal for you and a smoother process for your clients—now and in the future.

The Right Price: With costs an average of 10% less than branded fabrics, you can invest that difference in your business or pass on the savings to secure your next project. Either way, it’s a win.

Please review the reverse side for more specifics on our new program and, as always, contact us with any questions.

We look forward to working with you on your next project!

<tbody>
<tr>
<td><strong>FOCUS ON FABRICS</strong></td>
<td><strong>QUALITY PRODUCTS</strong></td>
</tr>
<tr>
<td>• Newly-refreshed and proprietary fabric assortment&lt;br&gt;• Our selection is engineered for the commercial market&lt;br&gt;• New fabrics come in more openness factors&lt;br&gt;• Fabrics offer more consistent thread and weave for richer color and cleaner look&lt;br&gt;• Superior lay-flat properties&lt;br&gt;• Simplified selection means less time spent choosing fabric&lt;br&gt;• Curated collection is easy to specify and easy to bid</td>
<td>• State-of-the-art, low VOC emission fabrics contribute to improved indoor air quality and are often specified in LEED™ projects&lt;br&gt;• Lead-free, GREENGUARD®*, and antimicrobial/antibacterial certified options&lt;br&gt;• FR rated options&lt;br&gt;• Color and fade resistant</td>
</tr>
<tr>
<td><strong>QUALITY PRODUCTS</strong></td>
<td><strong>INCREASED MARGINS</strong></td>
</tr>
<tr>
<td>• Extensive research and validation of fabrics—both internally and externally&lt;br&gt;• Rigorous validation of product manufacturing quality&lt;br&gt;• Multiple inspections to ensure product quality&lt;br&gt;• Engineered to endure—and to hang right&lt;br&gt;• UV and climate testing for color and extreme temperatures, respectively</td>
<td>• Exclusive fabrics mean a higher margin for you&lt;br&gt;• Expect an average 10% lower price than “branded” fabrics&lt;br&gt;• You can offer an improved bid or increase the profit for your business</td>

### YOUR SATISFACTION—AS WELL AS YOUR CLIENT’S—IS OUR TOP PRIORITY

- **ON-TIME SHIPPING**<br>Excellent on-time shipping rate. Our superior logistics ensure you get your solar shades when you need them.

- **SWATCHES**<br>Free and easy online swatching with expedited shipping.

- **SWFAssurance**<br>Our SWFAssurance process ensures that your solar shades are high quality, easy to install, and function correctly. We hang-test and operate every shade prior to shipping—checking for level, correcting for telescoping, and confirming proper alignment on coupled shades.

- **EXPERT SUPPORT**<br>We’re with you every step of the process. The SWFcontract team works closely with you and provides timely assistance—from sales support and customer service to specifications help and applications engineering.
